

Group Assignments for Fri, Dec 2

Remarks:

- Everyone should try to solve all problems, but each group is responsible for presenting the problems assigned to that group.
- You should have complete, written solutions ready to present in class on Friday, Dec 2.
- Make sure you get help from me or a tutor if you are stuck on a problem.
- The area outside my office is an excellent place to study and I am usually available to help you even besides the regular office hours. See my complete weekly schedule at my office door (or web site)
