## Practice on Area and Arc Length

A)Find the area of the region bounded by the curves $y=1-2 x, \quad y=\sqrt{x}, \quad y=-x$.
B) Find the area of the following regions bounded by the given curves by two methods: a) integrating with respect to x , and b ) integrating with respect to y .
i) $4 x+y^{2}=0, \quad y=2 x+4$
ii) $x+1=2(y-2)^{2} \quad x+6 y=7$
C)Find the length of the curve.
i) $y^{2}=x^{3}$ between $(1,1)$ and $(4,8)$.
ii) $y=6 \sqrt{x}, 1 \leq x \leq 4$.
iii) $12 x y=4 y^{4}+3$ between $\left(\frac{17}{2}, 1\right)$ and $\left(\frac{67}{24}, 2\right)$
